Energy-saving sugar beet pulp drying sweetens the production cost balance
Low temperature belt dryer with Conducto belts in the sugar industry

Picture 1: During the so-called sugar beet campaign the Austrian sugar producer AGRANA processes 25 truckloads per hour.

Picture 2: Low temperature belt dryer produced by the company Swiss Combi.

Picture 3: Low temperature belt dryers with woven mesh process belts manufactured by GKD reduce the energy consumption of the beet pulp drying process.

Picture 4: After the sugar has been extracted, the leftover beet pulp is dried and sold as animal feed.
